

Announcing: Revolutionary NEW ARP Ultra-Torque™

ARP Ultra-Torque gets you within 5% of the required pre-load on the first pull and stays consistent with each subsequent cycle – race prep, machining, pre-assembly and final assembly!

ARP Ultra-Torque was developed to:

- be more *consistent*
- be more *repeatable*
- have *no harmful contaminants*
- and achieve the target preload **ON THE FIRST TORQUE CYCLE**

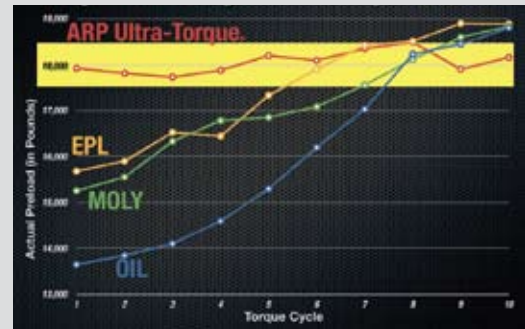

ARP Ultra-Torque Repeatability Data

Specifically designed as a fastener assembly lubricant for high performance engines

Repeatable: 1 stud –10 torque cycles: within 5% of target preload

Consistent : 10 studs –1 torque cycle: all within 5% of target preload

Better physical properties melting point, corrosion prevention, elimination of galling and seizing
